

G935 - 11i PSCM Administration

Course Objectives

This course has been developed in conjunction with the Staffordshire eGovernment Partnership rollout of Oracle CRM LG45 utilising PSCM (Public Sector Content Management).

This comprehensive class introduces the student to the full capabilities of PSCM and demonstrates the extensive range of technologies used to deploy PSCM solutions to local government.

The class introduces both Oracle and non-Oracle technologies including the eGIF standard that is deployed within the PSCM architecture. iTrain is pleased to provide additional eGIF training if required.

Who Should Attend	Prerequisites	Duration
Support staff	Oracle 11i Navigation (recommended)	2 Days
PSCM Development Staff	Oracle PL/SQL Knowledge	
Applications Technicians	XML Knowledge (ideally with the eGIF standard) (recommended)	

Course Contents

Introduction
