

G955 - Oracle 11i Configurator

Course Objectives

This practical course covers the Oracle Configurator module found within the 11i suite. The configurator module allows users to create their own professional form layouts and to bespoke tailor the appearance and functional content of the system

This practical course guides students through the technical development skills needed to fully utilise the functionality of Oracle Configurator.

N.B. We are pleased to tailor this course to include development of customer specific modules, if requested in advance of the course.

Who Should Attend	Prerequisites	Duration
Database Administrators	Familiarity with Oracle 11i Functionality	1 Day
Team Leaders		
Data Managers		
IT Service Personnel		

Course Contents
